

CONTENTS

Role of Macrophages in Natural Resistance to Virus Infections. SØREN C. MOGENSEN	1-26
The Search for Guanosine Tetrphosphate and Other Unusual Nucleotides in Eucaryotes. ROBERT H. SILVERMAN AND ALAN G. ATHERLY*	27-41
Growth Inhibition as a Consequence of Antagonism Between Related Amino Acids: Effect of Valine in <i>Escherichia coli</i> K-12. MAURILIO DE FELICE,* MARK LEVINTHAL, MAURIZIO IACCARINO, AND JOHN GUARDIOLA	42-58
Microbial Cooxidations Involving Hydrocarbons. JEROME J. PERRY	59-72
Chromosomal Genetics of <i>Pseudomonas</i> . B. W. HOLLOWAY,* V. KRISHNAPILLAI, AND A. F. MORGAN	73-102
Serological Responses to Antigens of <i>Bacteroidaceae</i> . TOR HOFSTAD	103-115

CONTENTS

Biosynthesis of Cell Walls of Fungi. V. FARKAŠ	117-144
Antibiotics of the Virginiamycin Family, Inhibitors Which Contain Synergistic Components. C. COCITO	145-198
Shutoff of Host Macromolecular Synthesis After T-Even Bacteriophage Infection. JAMES F. KOERNER* AND D. PETER SNUSTAD	199-223
Tetanus Toxin. BERNARD BIZZINI	224-240
Temperature and Host Defense. NORBERT J. ROBERTS, JR.	241-259
Methanogens: Reevaluation of a Unique Biological Group. W. E. BALCH, G. E. FOX, L. J. MAGRUM, C. R. WOESE, AND R. S. WOLFE*	260-296

CONTENTS

Chromatin Replication Revealed by Studies of Animal Cells and Papovaviruses (Simian Virus 40 and Polyoma Virus). CHANTAL CRÉMISI	297-319
--	---------

* Asterisk refers to person to whom inquiries regarding the paper should be addressed.

CONTENTS

Nonenteric Toxins of <i>Staphylococcus aureus</i> . MARVIN ROGOLSKY	320-360
Implications of Some Genetic Control Mechanisms in <i>Neurospora</i> . ROBERT L. METZENBERG	361-383
Bacterial Iron-Sulfur Proteins. DUANE C. YOCH* AND ROBERT P. CARITHERS	384-421
Secondary Metabolites of the Fluorescent <i>Pseudomonads</i> . T. LEISINGER* AND R. MARGRAFF	422-442

VOLUME 43 • DECEMBER 1979 • NUMBER 4

CONTENTS

Contributions of Microbiology to Eucaryotic Cell Biology: New Directions for Microbiology. R. DULBECCO	443-452
Biochemistry of <i>Plasmodium</i> (Malarial Parasites). IRWIN W. SHERMAN	453-495
Bacterial Bioluminescence: Its Control and Ecological Significance. J. W. HASTINGS* AND K. H. NEALSON	496-518

Erratum

Biosynthesis of Cell Walls of Fungi. V. FARKAŠ	519
--	-----

* Asterisk refers to person to whom inquiries regarding the paper should be addressed.

SUBJECT INDEX

VOLUME 43

- Acetohydroxy acid synthase isoenzymes
 - E. coli* K-12, 42
- Adenosine tetraphosphate
 - in eucaryotes, 27
- Adenylyl sulfate reductase
 - bacterial, 384
- Aerobic bacteria
 - ferredoxin-dependent reactions, 384
- Algae
 - bleaching by virginiamycin family, 145
- Alpha-toxin
 - S. aureus*, 320
- Amidase system
 - Pseudomonas*, 73
- Amino acids
 - antagonism and growth inhibition, 42
 - fluorescent pseudomonads, 422
- Animal cells
 - chromatin replication, 297
- Animals, domestic
 - use of virginiamycin family, 145
- Antibiotics, resistance
 - Pseudomonas*, 73
- Antibiotics, virginiamycin family
 - action, 145
 - chemistry, 145
 - physics, 145
- Antigens, *Bacteroidaceae*
 - serological responses, 103
- Antimicrobial agents
 - temperature, 241
- aro* anabolic enzyme aggregate
 - Neurospora*, 361
- Aromatics
 - microbial cooxidation, 59
- Bacteria
 - action of virginiamycin family, 145
- Bacterial bioluminescence
 - control, 496
 - ecological significance, 496
- Bacterial cell-free systems
 - action of virginiamycin family, 145
- Bacteriophage infection, T-even
 - host macromolecular synthesis shutoff, 199
- Bacteroidaceae*
 - serological classification, 103
- Bacteroidaceae*, antigens
 - serological responses, 103
- Beta-toxin
 - S. aureus*, 320
- Bioluminescence
 - bacterial, 496
- Capsular antigens
 - Bacteroidaceae*, 103
- Carbohydrate transport
 - Plasmodium*, 453
- Cells, animal
 - chromatin replication, 297
- Cell wall
 - methanogens, 260
- Cell wall biosynthesis
 - fungi, 117
- Chitin
 - fungal cell wall, 117
- Chloroplasts, eucaryotes
 - presence of guanosine tetraphosphate, 27
- Chromatin replication
 - animal cells, 297
 - papovaviruses, 297
- Clostridia
 - ferredoxin-dependent reactions, 384
- Coenzyme F₄₂₀
 - methanogens, 260
- Coenzyme M
 - methanogens, 260
- Commensal luminous bacteria
 - distribution, 496
 - habitats, 496
- Cooxidation, microbial
 - hydrocarbons, 59
- CO₂ reductase
 - bacterial, 384
- Cycloparaffinics
 - microbial cooxidation, 59
- Delta-toxin
 - S. aureus*, 320
- Deoxyribonucleic acid
 - chromatin replication, 297
- Deoxyribonucleic acid base composition
 - methanogens, 260
- Deoxyribonucleic acid degradation
 - T-even phage infection, 199
- Desulfovibrio*
 - ferredoxin-dependent reactions, 384
- Diadenosine tetraphosphate
 - in eucaryotes, 27
- Diguanosine tetraphosphate
 - in eucaryotes, 27
- Dihydroorotate dehydrogenase
 - bacterial, 384
- Enzymes, iron-sulfur
 - bacterial, 384
- Erythrocytes
 - Plasmodium* infection, 453
- Escherichia coli* K-12
 - valine and growth inhibition, 42
- Eucaryotes
 - occurrence of guanosine tetraphosphate and other

- unusual nucleotides, 27
- Eucaryotic cell biology
 - contributions of microbiology, 443
- Eucaryotic suborganellar systems
 - action of virginiamycin family, 145
- Exfoliative toxin
 - S. aureus*, 320
- Ferredoxins
 - bacterial, 384
- Fluorescent pigments
 - fluorescent pseudomonads, 422
- Fluorescent pseudomonads
 - secondary metabolites, 422
- Formate dehydrogenase
 - bacterial, 384
- Fungi
 - cell wall biosynthesis, 117
- Fusobacterium nucleatum*
 - P2 antigen, 103
- Gamma-toxin
 - S. aureus*, 320
- Gene, transforming
 - viral, 443
- Glucans
 - fungal cell wall, 117
- Glutamate synthase
 - bacterial, 384
- Glutamine phosphoribosyl pyrophosphate amido
 - transferase
 - bacterial, 384
- Guanosine tetraphosphate
 - in eucaryotes, 27
 - in procaryotes, 27
- Histones
 - chromatin replication, 297
- Host defense
 - temperature, 241
- Humans
 - use of virginiamycin family, 145
- Hydrocarbons
 - microbial cooxidation, 59
- Hydrogenase
 - bacterial, 384
- ω -Hydroxylase
 - bacterial, 384
- Hyperthermia
 - effects, 241
- Hypothermia
 - effects, 241
- Immune function
 - temperature, 241
- Immune response
 - infection with *Bacteroidaceae*, 103
- Infection, *Bacteroidaceae*
 - detection, 103
 - immune response, 103
 - immunoprophylaxis, 103
- Infection, T-even phage
 - host macromolecular synthesis shutoff, 199
- Infection, virus
 - role of macrophages in resistance, 1
- Iron-sulfur proteins
 - bacterial, 384
- Isoenzymes, acetohydroxy acid synthase
 - E. coli* K-12, 42
- Leucocidin
 - S. aureus*, 320
- Light organ symbionts
 - luminous bacteria, 496
- Lipid biosynthesis
 - Plasmodium*, 453
- Lipid composition
 - methanogens, 260
